Portfolio: datawizardryy-coder.github.io/DataWizardryy/

PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience in SQL-driven analytics, Power BI dashboard development, and ETL validation. Specializes in KPI automation, operational reporting, and AI-assisted analytics — turning complex, multi-source datasets into structured business intelligence. Proven ability to reduce manual effort through workflow automation and deliver decision-ready insights to stakeholders.

TECHNICAL SKILLS

Databases & Query: SQL (CTEs, Window Functions, Query Optimization)

BI & Reporting: Power BI (DAX, Data Modeling, Star Schema, Dashboard Development)

Data & Analysis Tools: Advanced Excel (Power Query, VBA, Macros, Pivot Tables), Python (basic data cleaning & ETL support)

Competencies: ETL, Data Validation, KPI Monitoring, SLA Compliance, Workflow Automation, AI-Assisted Analytics

PROFESSIONAL EXPERIENCE

Process and Data Analyst – Tanya Dewani and Associates (TDCA)

Feb 2025 – Apr 2026

- Managed analytics and reporting for Magaya Corporation under the Rate Management System (RMS), covering freight rate contracts and pricing data across multiple client accounts.
- Automated complex reporting tasks using Excel Macros, reducing task completion time from 3–4 hours to under 1 hour — a ~70% efficiency gain on high-complexity workflows.
- Validated and reconciled freight rate contracts using optimized SQL queries (CTEs, Window Functions), improving pricing accuracy and reducing manual reconciliation effort.
- Developed Power BI dashboards for SLA tracking, rate accuracy monitoring, and KPI reporting, improving management visibility into operational compliance.
- Supported audits and compliance reviews through structured documentation and data controls.

Data Analyst – AUM Technical Services, Hyderabad

Aug 2023 – Nov 2024

- Delivered 15+ analytics projects converting complex, multi-source datasets into actionable business insights for operational and strategic decision-making.
- Built and maintained 10+ Power BI dashboards improving management visibility and KPI tracking across business units.
- Supported SQL and ETL pipeline workflows for data extraction and transformation, ensuring high data accuracy and validation across reporting cycles.
- Performed data verification and security compliance on government-sourced datasets for the E-KAM project using Advanced Excel, ensuring integrity of incoming records.

PROJECTS

US Consumer Waste & Purchasing Behavior Dashboard

Power BI · SQL · Excel · AI

- Built a 2-page interactive Power BI report analyzing consumer purchasing and waste trends across Clothing, Footwear, and Tech categories (2020–2024) using data from EPA, AAFA, CTA, and BEA.
- Utilized SQL window functions and CTEs to aggregate multi-source data and optimize the backend data model powering the Power BI report.
- Engineered 10 DAX measures including YoY Waste Growth, Waste-to-Purchase Ratio, and Recycling Rate vs. EPA 50% Target; implemented cross-filtering, slicer sync, and drill-through interactivity.
- SQL scripts and supporting data pipelines hosted on GitHub; report published to Power BI Service for interactive sharing.

EDUCATION

Bachelor of Commerce (Computer Applications)

2022
